JENTLE PED® 120JP crescent shaped foot spa.

FOR IMMEDIATE RELEASE:

JENTLE PED: THE SOLE OF RELAXATION!

MTI Whirlpools Flushes Out The Secrets Of Safe, Hygienic Foot Spas.

(ATLANTA, GA – April 24, 2007) MTI Whirlpools has taken great “STEPS” to ensure that their Jentle Ped® foot spas are the most hygienic baths available to consumers today! Other spas on the market come with hidden risks - making bathers susceptible to infections and irritants due to dangerous bacteria from contaminated water. But MTI’s built-in Fill-Flush® whirlpool cleaning system ensures a safe and comfortable soak every time. So sit back, relax, and soak those feet in the most therapeutic AND SAFEST bath on the market!

The news headlines have cited many instances where infections and lesions have resulted from contaminated foot spas especially in commercial use. The risks are real, and consumers need to be informed. But with MTI’s innovative and patented Fill-Flush system, users can rest assured that they are getting a completely hygienic soak with every single use. The Fill-Flush cleaning system is unique in that it circulates cleaning solution and fresh water through the internal plumbing system, including the water and air lines, point-massage jets and pump. This innovative cleaning action is the key to the success of the Jentle Ped and your assurance that you have invested in the safest foot spa available!

Available in three models, Jentle Ped lets you put your best foot forward with a style and size that’s uniquely you. The original 110JP measures 28” x 23” x 13”/10.5” deep and retails for \$878 - \$1845 depending on color and options. The 120JP curved design, measures 26.5” x 24” x 12.875”/9.25” deep and retails for \$928 - \$1895. The compact 130JP, measures 25.25” x 18.5” x 11.75” / 8.75” deep and retails for \$900 - \$1866. A drop-in design, whether contemporary square or contoured, allows the foot spa to blend effortlessly with your existing décor, making it an easy yet much-appreciated addition to any bathroom designed with luxury in mind.

Each Jentle Ped incorporates MTI’s soothing heat, massage and whirlpool jets that rejuvenate weary feet from heel to toe. Four directional high-flow jets (2 in the 130JP) can be adjusted to target specific areas of the feet. Once you set the initial water temperature, Jentle Ped will maintain a steady or slightly increasing temperature (maximum increase of 5°) for a comfortable, mindless soak with no effort required. Jentle Ped has a gently sloped floor that positions the feet in a relaxed position, while dual curved recesses cradle the calves (not in the 130JP). A raised bar in the center of the bath floor encourages the user to stretch and exercise different regions of the foot during the bath, similar to reflexology, a healing massage technique practiced for centuries in Asia, Europe and Egypt.

JENTLE PED® 130JP space-saving model.

Jentle Ped is well-suited for residential or commercial installation. Crafted of durable, high-gloss cross-linked cast acrylic, the sleek spa is available in 50 stunning colors and includes a one-year limited warranty. Add a handheld sprayer for greater ease and convenience and select from chrome or brushed nickel finish for jets and controls. Optional soft, removable pillows provide a comfortable foot rest before or after bath as well as during pedicures.

Another available option is Ozone, the most powerful oxidizer and disinfectant. It kills all known bacteria, viruses, cysts, yeasts, molds and mildew and helps to rid the water of disease-causing microorganisms while you are enjoying the foot spa. And for commercial applications this adds a measure of sanitary safety for the spa technician.

Innovation has always been a hallmark of MTI, the pioneer of whirlpool cleaning systems. MTI's patented Fill-Flush® and Simple Touch® have set the standard for whirlpool cleaning systems, and they still remain unparalleled in the industry. In short, they are the best whirlpool cleaning systems on the market. When used on a regular basis, they will keep the internal whirlpool plumbing system clean and hygienic.

Since 1988, MTI Whirlpools has earned a reputation for impeccable quality, innovation and unique customizations for air baths, whirlpools and soaking baths, offering more than 100 models in 50 colors with endless options. MTI also offers a wide variety of durable acrylic shower bases, shower enclosures and sinks.

Located near Atlanta, the employee-owned company offers products through an exclusive network of kitchen and bath showrooms throughout the country. The company is gaining national recognition for its ability to provide products that are both innovative and classic.

Add Jentle Ped to your home bath environment, and you won't have to trek to the spa to pamper your aching feet. For more information call 800-783-8827 or visit www.mtiwhirlpools.com.
